Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. Computer Aided Network Design 55 Path Loss Calculation The path loss slope, describing how quickly the path loss decreases due to distance, depends on the distance between the transmitter and receiver and the obstacles in between. The path loss model used in CAPACITY is a simple Hata type of model [90], as seen in Equation (1).
