Practice for use of the alanine-EPR dosimetry system This standard has been revised by ISO/ASTM ISO/ASTM covers materials description, dosimeter preparation, instrumentation, and procedures for using the alanine-EPR dosimetry system for measuring the absorbed dose in the photon and electron irradiation processing of materials. ISO/ASTM covers materials description, dosimeter preparation, instrumentation, and procedures for using the alanine-EPR dosimetry system for measuring the absorbed dose in the photon and electron irradiation processing of amisboutiquex.com: ISO/TC ISO/ASTM is one of a set of standards that provides recommendations for properly implementing dosimetry in radiation processing, and describes a means of achieving compliance with the requirements of ASTM E for alanine dosimetry system. The alanine-EPR dosimetry system provides a means for measuring absorbed dose. It is based on the measurement of specific stable free radicals in crystalline alanine generated by ionizing radiation. Alanine-EPR dosimetry systems are used in reference- or transfer-standard or routine dosimetry. Practice for use of an alanine-EPR dosimetry system This practice covers dosimeter materials, instrumentation, and procedures for using the alanine-EPR dosimetry system for measuring the absorbed dose in the photon and electron radiation processing of.
