The Genesis of Topology In the beginning, God created the set, but the set was empty and void. And God said Let there be elements, and let the elements combine into subsets, unions and intersections, and let there be formal logic. And God divided the true from the untrue, and saw that the true was good. The subject of topology itself consists of several different branches, such as point set topology, algebraic topology, differential topology, density topology, analytic topology, manifold topology, knot-topology, chaos-topology, etc. In order to set up a list of libraries that you have access to, you must first login or sign up.
